***Election/Restrictions***

1. Claim 1 is generic and allowable. Accordingly, the restriction requirement as to the encompassed species is hereby withdrawn and claims 3 and 14-18, directed to the species of microscope with a bolt element as a lever no longer withdrawn from consideration since all of the claims to this species depend from or otherwise include each of the limitations of an allowed generic claim.

In view of the above noted withdrawal of the restriction requirement as to the linked species, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable generic linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

**REASONS FOR ALLOWANCE**

***Allowable Subject Matter***

2. Claims 1-18 are allowed.
3. The following is an examiner's statement of reasons for allowance:
4. Claim 1 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "a preloaded bolt element which coacts with the flap in such a way that when the flap is open, the bolt element automatically locks the rotatable element" as set forth in the claimed combination. Claims 2-8 are also allowable based upon their dependence on claim 1.

Claim 9 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "a preloaded pin which coacts with the flap in such a way that when the flap is open, the pin automatically locks the rotatable element" as set forth in the claimed combination. Claims 10-13 are also allowable based upon their dependence on claim 9.

Claim 14 is allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest, "a preloaded lever which coacts with the flap in such a way that when the flap is open, the lever automatically locks the rotatable element" as set forth in the claimed combination. Claims 15-18 are also allowable based upon their dependence on claim 14.

The prior art of record, Schalz teaches a microscope comprising a stand, an element rotatable about an axis (37b) that carries several optical elements; and a flap (31) provided at the stand. Also, the prior art of record, Ken JP 2003029160 teaches a microscope comprising a stand, an element rotatable about an axis (40) that carries several optical elements (45) and a bolt element (75). However, neither Schalz or Ken teach a preloaded bolt or pin or lever element which coacts with the flap in such a way that when the flap is open, the bolt or lever element automatically locks the rotatable element and there is no motivation or teaching to modify this difference as derived.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
